NEC, Birmingham

HALO TRAINING TO SHOW INNOVATIVE ON DEMAND TRAINING PRODUCT FOR FIRST TIME

Halo Training Limited will be demonstrating its innovative 'On Demand Training' (ODT) solution for the first time ever. The self-contained, bespoke learning package is aimed at production and maintenance personnel within pharmaceutical, beverage and food processing and packaging companies, and offers a wide range of benefits including reduced costs, significantly improved operating efficiencies and increased 'up time'.

Using an exciting combination of needs analysis and cutting-edge multimedia technology, ODT teaches machine operators, maintenance staff, supervisors and other production staff about manufacturing processes, and how to operate and maintain even the most advanced machines safely and easily. It allows them to manage their own training schedule by dictating the level and speed of learning.

Provided online or nearline CD or high speed intranet / internet, each highly visual ODT solution incorporates stimulating animation, video and audio material to help clearly demonstrate plant processes and equipment operating functions and procedures; for example, cleaning and maintenance, troubleshooting and health and safety issues.

Recently added features include an *interactive fault diagnostics chart* linked to video and animation, which is useful for illustrating maintenance procedures and *multilingual voiceover capability* – allowing global businesses to implement ODT in

Cont.../2

Europe and the rest of the world. It is also beneficial for companies within the UK that employ a large ethnic workforce.

Halo Training's ODT modules can be conveniently provided via PCs, Laptops, or intranet-based web browsers. Help links can also keep operators in close contact with equipment suppliers minimising downtime and improving profitability. Lifetime support contracts are also available.

Visitors to Halo Training's stand at PPMA will be able to try out the ODT product for themselves as well as take home a fully functional trial version to peruse at their leisure or show colleagues.
